

Recyclo E-WASTE GUIDE

Definition:

Electrical and electronic equipment of any kind that has been discarded.

WHY DOES IT MATTER?

Our world faces severe environmental challenges, including climate change, loss of biodiversity, and resource depletion.

- E-waste is one of the fastest growing solid waste streams in the world.
- In 2022, an estimated 62 million tonnes of e-waste were produced globally, of which only 22.3% was recycled.
- Informal recycling of e-waste increase exposure of substances such as lead, with adverse health effects.

WHAT IS RECYCLO'S MISSION?

Allow individuals to locate the most convenient recycle location appropriate to the type of waste at hand.

Acknowledge everyone has a role to play in shaping the future of a more sustainable world.

E-WASTE RECYCLE LOCATIONS:

PERMANENT E-BIN

Dispose of regulated E-waste at ease
